Blockchain as driver for digitization

Blockchain Maturity

<h2>Security & Privacy</h2>	<ul style="list-style-type: none">  Open source standard. 	<ul style="list-style-type: none">  Double blind: blinding between participants  Central repository of transactions  Central identity broker  Obfuscation protocols on top of open standard to achieve privacy 	<ul style="list-style-type: none">  Triple blind: Central blind identity broker  No private data leaves country  No transaction data stored centrally  Fully dark protocol; no noisy, or malicious state power can get access
<h2>Audit & Compliance</h2>	<ul style="list-style-type: none">  Full transparency out of the box  Full secrecy out of the box 	<ul style="list-style-type: none">  Specific audit reporting to provide XBRL type reporting.  Specific functionality to comply with topical regulation (GDPR; EU161) 	<ul style="list-style-type: none">  Platform business KPIs in a blind world (how do we bill) solved  Throughput interrogation and analytics solved
<h2>Adoption</h2>	<ul style="list-style-type: none">  If we build it, they will come 	<ul style="list-style-type: none">  Community consortium of industry leaders  Node Strategy with separate channels  Community out reach effective  Consensus withstands challenge 	<ul style="list-style-type: none">  Brand neutral joint venture  Incentivized adoption  Tumbling  Separate settlement layer  Interoperability

Commodities Trade

Industry Segments	Live Production Use Cases	Tools	
<p>1: Trading</p>	<p>“When the technology becomes available, you have to embrace it.” Nader Naeimi, AMP Capital Investors</p> <p>“The use of this technology will permit fintechs and other financial actors to offer new solutions for exchanging securities, solutions that are faster, cheaper, more transparent and more secure,” Finance Minister Bruno Le Maire</p>	<p>A January 19, 2017 Mercuria introduces blockchain to oil trade with ING, SocGen</p> <p>B November 6, 2017 BP, Shell lead plan for blockchain-based platform for energy trading</p> <p>C November 17, 2017 Over 20 Banks Join Singapore-Hong Kong Blockchain Trade Network</p> <p>D December 7, 2017 ASX Ltd. will start using blockchain -- to process equity transactions.</p> <p>E December 8, 2017 France to allow blockchain for trading unlisted securities</p>	<p>Digital Asset Holdings technology</p> <p>Hyperledger</p> <p>Undisclosed</p> <p>To be determined</p> <p>To be determined</p>

Trade Finance

Industry Segments	Live Production Use Cases	Tools
1: Logistics	A September, 2016 Barclays and Wave become first to execute global trade using blockchain technology.	Wave
2: Insurance	B October 04, 2017 New collaboration on trade finance platform built on blockchain Batavia, CaixaBank, Commerzbank and Erste Group	Hyperledger
3: Financing	C October 06, 2017 AIG partners with TradeIX, Standard Chartered for blockchain-enabled trade finance transaction	Not disclosed
<p>“ By using this blockchain-enabled platform, clients are able to benefit from the extended ecosystem that trade finance brings, but with a reduction in friction and cost and an improvement in speed and transparency.” Marilyn Blattner-Hoyle AIG’s head of supply chain and trade finance</p>	D October 18, 2017 CGI integrates blockchain with conventional trade finance platform Bank of Montreal, Royal Bank of Canada and MUFG	Not disclosed
	E October 25, 2017 Hong Kong, Singapore to link up trade finance blockchain platforms	Bespoke Ledger

Provenance

Industry Segments

1: Logistics

"It was painfully obvious to me that the blockchain could be used to track objects, and of course one of the largest pain points that runs through the supply chain is provenance,"
Everledger CEO Leanne Kemp

Identity

Industry Segments

1: Logistics

"This is transformational for identity. It makes it easier for me to prove it's me and harder for the 'bad guy' to masquerade as me."
Greg Wolfond, CEO of SecureKey

Live Production Use Cases

A

May 4, 2017
U.S. credit agencies test Canadian blockchain identity network

B

October 11, 2017
IBM, Hyperledger Join Blockchain Identity Consortium

C

October 11, 2017
National Bank of Canada joins SecureKey digital identity network

D

November 15, 2017
SecureKey Taps IBM Blockchain for Digital Identity System Launch

Banking Services

Industry Segments

1: Remittance

“To send a £1000 through the Barclay's to a non-EEA country, the total will be £1040 + receiver fee, plus £20 they charge for tracking. Plus an additional £7 fee for paperwork. A trans-Atlantic transaction took almost a week and required the receiver to visit the bank branch to prove his identity.

The same payment in BTC with Cryptopay results in 0.0005 BTC (£0.89) fee and would be delivered in an hour or three.”

Live Production Use Cases

A

November 23, 2016

Over 100 Migrant Workers Test Blockchain Remittance in Thailand

B

Deep Dive - Counterfeit Pharmaceuticals

Dying people per year
in Africa

120,000

Counterfeit drug
market annually

\$200 billion

Most counterfeit
drugs manufactured

India or China

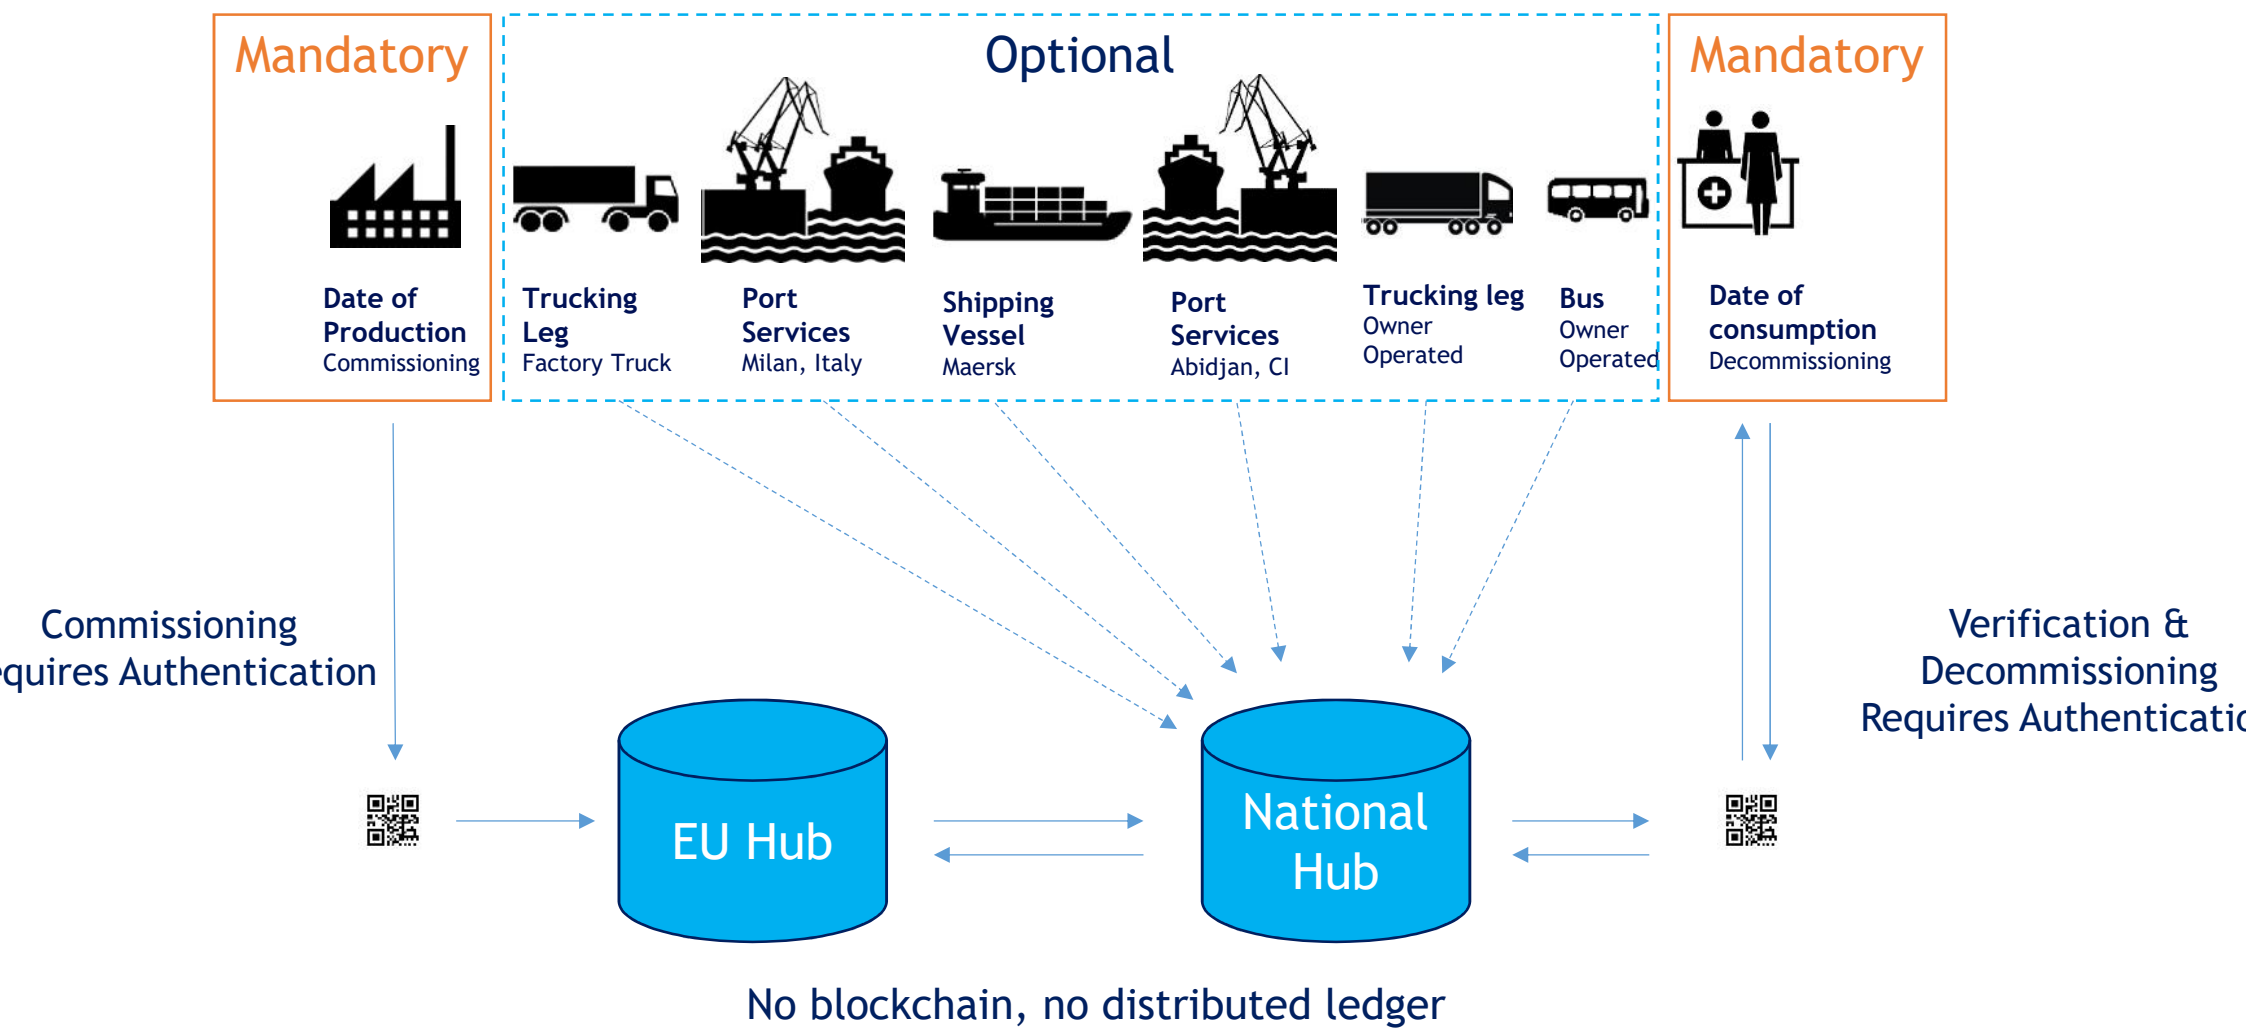

Internet sales of
counterfeit drugs

\$75 billion

Counterfeit drugs in
some countries

up to 50%

Pharma Serialization, EMVO - Counterfeit Pharmaceuticals

Why Blockchain - Counterfeit Pharmaceuticals

Three Key Advantages of Distributed Architecture for Serialization

Immutable Trust

Proof of identity, and business identity, as well as the ability to quickly add new members to the supply chain would not be possible with legacy architecture

Legacy architecture for the same build becomes cost prohibitive due to security and authorizations

Tracking & Feedback

The smart contract execution allows for a full visibility at every stage of the product supply chain

Increases trust and differentiates the manufacturer

Incentivizing desired behaviour

The smart contract execution and crypto currency aspects of the blockchain can be used to steer behaviours through loyalty

Incentivizing the adoption of the membership in clear fungible currency.

Deep Dive - Currency Remittance
